Alternate mounting methods (closed position)

Mounting distance between rivets and centerline of hinge can be varied by reversing one or

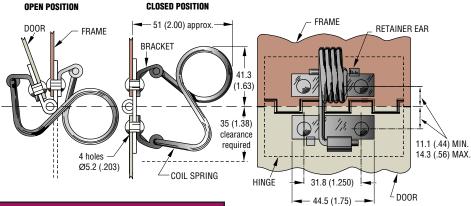

both brackets.

Mount as shown when door is at 90° angle to frame.

Heavyweight size

PART NUMBER23-10-11-12 •

Material and Finish

SPRING: Spring steel, zinc plate, chromate plus sealer.

BRACKET: 1010 Steel, zin plate, chromate plus sealer.

Installation

(Lightweight sizes)

- 1. Drill or punch four Ø**D** holes through the hinge and/or panel.
- 2. Attach spring brackets (interchangeable) to the frame and door with door fully open.
- 3. Slip short leg of spring into frame bracket.
- 4. Slip long leg of spring into door bracket.
- 5. With spring in place, bend retainer ears over to secure spring.
