

FATH®

FLOWSORT SORTING SYSTEMS

Intralogistics reinvented – modular, simple, scalable

- Sorting performance: 2,500–6,000 products per hour
- Plug & Play Easy integration in conveyor systems saves planning and installation time
- Gentle transport: Redirection of products in "Flow" - no abrupt braking or excessive mechanical force
- Scalability Sorting systems can be easily expanded at any time
- Modularity: innovative standard modules for maximum flexibility

HIGHLIGHTS

The Flowsort product portfolio consists of standardized sorting modules. With just three different modules - Single Line Diverter, Double Line Diverter and ZigZag Diverter - many different use cases can be addressed - with a single underlying system. All Flowsort sorting modules harmonize with all other intralogistics systems and technologies. They are easy to install, both in terms of hardware as well as for the software connection.

The conceptual design ensures a high degree of scalability and offers a completely new level of flexibility: Sorting performance and layout can be adjusted to meet current requirements at any time. Even retrofitting existing intralogistics systems can be easily implemented with Flowsort. And all this comes in a fresh and modern design! The "Flow" ensures that

the sorted material is diverted particularly gently, without abrupt braking or mechanical force. This makes Flowsort sorting systems suitable even for fragile goods. The energy consumption of the modules is very low due to the operation with 24 V motors. This enables energy savings and benefits the environment. Designed and manufactured in The Netherlands, Flowsort sorting modules are very robust and ensure reliable operation of the automatic sorting system.

FLEXIBLE & SYSTEM-INDEPENDENT

The solution to current intralogistics challenges

In the distribution sector, smaller decentralized distribution centers are increasingly needed to ensure fast deliveries in conurbations. New automation technologies are needed to meet this challenge. Flowsort sorting modules are straightforward, flexible, quick to install, system independent and highly scalable. This makes the Flowsort modules perfect for streamlining intralogistics processes and setting up smaller distribution centers.

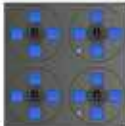

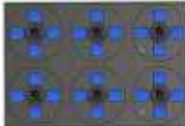

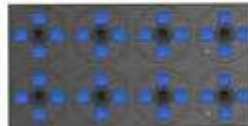

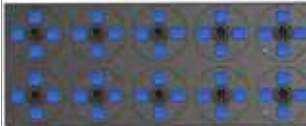

SLD = Single Line Diverter
DLD = Double Line Diverter

The SLD (single row) and DLD (double row) are high-speed sorters that can be incorporated into any conveyor system. Flow is a modular system that you can configure according to your needs. For example, when you need a 3-row system, you connect an SLD (1-row) and a DLD (2-row) together - all plug & play. The SLD and DLD can each be ordered to the millimetre in the widths described below. This means that they can be easily and precisely installed in almost all conveyor systems.

The following widths are available:

- 400 – 450 mm
- 600 – 650 mm
- 800 – 850 mm
- 1000 -1050 mm

	400-450 mm	600 - 650 mm	800 - 850 mm	1000 - 1050 mm
SLD (1 row)	 (2 sorter discs)	 (3 sorter discs)	 (4 sorter discs)	 (5 sorter discs)
DLD (2 rows)	 (4 sorter discs)	 (6 sorter discs)	 (8 sorter discs)	 (10 sorter discs)

ZZ= “ZigZag” Diverter

The ZZ-Diverter is a high-speed sorter in which the deflection discs are arranged in a zigzag line. This design allows the sorting of small packages with a size of at least 80x80mm.

The following widths are available:

- 400 mm
- 600 mm
- 800 mm
- 1000 mm

FLWSORT® SINGLE LINE DIVERTER SLD

DESCRIPTION	For automated sorting of objects with a minimum size of 150 x 150 mm (e.g boxes, containers, cartons, envelopes, etc.) Easy and fast integration in all common conveyor systems Sorts in flow without abrupt movements, thus making it suitable also for sensitive goods Maximum layout flexibility due to stepless outfeed angles - 90° to +90° Plug & Play integration into all common PLC systems Retrofitting and scaling possible at any time Maximum sorting capacity: 6000 pieces / hour, depending on size of transported goods
MATERIAL	Rollers: Plastic TPU ≈ 70 Shore Case: Steel
SURFACE	Case: Laquered
COLOR	Rollers: Blue Case: Black
OPERATING VOLTAGE / FREQUENCY	24 V DC
PACK QUANTITY	1 piece
TIP	All widths between 400 - 450 mm, 600 - 650mm, 800 - 850 and 1000 - 1050 mm available
CONTROL	1 control card per row: Standard I/O via M8 connector Supported protocols: Profinet, Ethernet I/P, Modbus/TCP or EtherCAT
MAX. MASS CONVEYED GOOD (KG)	35 kg
MIN. MASS CONVEYED GOOD (KG)	0.05 kg
SPEED	Rotating speed: 180°/ 0.35 s Max. conveying speed: 1.5 m/s

ELECTRIC MOTOR FOR FLOWSORT® DIVERTERS

MODEL	Compatible with SLD, DLD and ZZ diverters
DESCRIPTION	Durable casing Low energy consumption M8 - 4 Pin connector
OPERATING VOLT-AGE / FREQUENCY	24 V DC
OPERATING CURRENT	2,5 A - 3,5 A
OPERATING TEMPERATURE	-10 °C - + 40 °C
IP RATING	IP54
PACK QUANTITY	1 piece
POWER OUTPUT	40 - 50 W

	Version	Weight [kg]	Part #
	Drive motor for conveyor roller	1.3	E000001
	Control motor for disc module	1.3	E000002

CONTROL UNIT CONVEYLINX-AI2 FOR FLOWSORT® DIVERTERS

MODEL	Compatible with SLD, DLD and ZZ diverters
DESCRIPTION	Control of up to 2 motors and 2 sensors Supported protocols: Profinet, ethernet I/P, modbus/TCP, etherCAT Product tracking data handling for easier PLC programming Completely programmable and configurable M8 female connector for connecting npn- or pnp phototransistors, M8 male connector for connecting motors Durable casing
OPERATING VOLT-AGE / FREQUENCY	24 V DC
IP RATING	IP54
PACK QUANTITY	1 piece

Weight [kg]	Part #
0.2	E000003

CONTROL UNIT MOTIONLINX-AI FOR FLOWSORT® DIVERTERS

MODEL	Compatible with SLD, DLD and ZZ diverters
DESCRIPTION	Control of up to 2 motors and 2 sensors, Supported protocols: EtherCAT M8 female connector for connecting npn- or pnp phototransistors, M8 male connector for connecting motors Motor error detection Adjustable acceleration and deceleration Durable casing
OPERATING VOLTAGE / FREQUENCY	24 V DC
IP RATING	IP54
PACK QUANTITY	1 piece

Weight [kg]	Part #
0.2	E000004

INDUCTIVE POSITION SENSOR FOR FLOWSORT® DIVERTERS

MODEL	Compatible with SLD, DLD and ZZ diverters
DESCRIPTION	Ready-to-use position sensor M12 thread for fastening and positioning Without connection cable
PACK QUANTITY	1 piece

Weight [g]	Part #
27	E000005

WHEEL DRIVE ASSEMBLY FOR FLOWSORT® DIVERTERS

MODEL	Compatible with SLD, DLD and ZZ diverters
DESCRIPTION	Ready to use wheel drive assembly
MATERIAL	Cover Plate: Steel Frame: Plastic POM Rollers: Plastic TPU Bevel gear: Plastic POM
SURFACE	Cover plate: Laquered
COLOR	Frame: Black Rollers: Blue
PACK QUANTITY	1 piece

Weight [g]	Part #
930	S000003

PULLEY DRIVE ASSEMBLY FOR FLOWSORT® DIVERTERS

MODEL	Compatible with SLD, DLD and ZZ diverters
DESCRIPTION	Ready to install pulley drive assembly Compound of pulleys, bevel gear and axles
MATERIAL	Large Pulley: Aluminum Small pulley: Steel Bevel gear: Plastic POM Hollow axles: Steel
PACK QUANTITY	1 piece

Weight [g]	Part #
810	S000004

BEVEL GEAR FOR FLOWSORT® DIVERTERS

MODEL	Compatible with SLD, DLD and ZZ diverters
DESCRIPTION	Bevel Gear with \varnothing 10 mm diameter for drive of conveyor rollers, With keyway 3 x 3 mm
MATERIAL	Plastic POM
PACK QUANTITY	1 piece

Weight [g]	Part #
11	I000005

TIMING BELT TENSIONER ELEMENT FOR FLOWSORT® DIVERTERS

MODEL	Compatible with SLD, DLD and ZZ diverters
DESCRIPTION	Ready to use belt tensioner element
MATERIAL	Tensioning unit: Steel Tensioner pulley: Aluminum
PACK QUANTITY	1 piece

Version	Weight [g]	Part #
Timing Belt Tensioner Element	144	S000023

TIMING BELT TENSIONER ELEMENT REVERS FOR FLOWSORT® DIVERTERS

MODEL	Compatible with SLD, DLD and ZZ diverters
DESCRIPTION	Ready to use belt tensioner element
MATERIAL	Tensioning unit: Steel Tensioner pulley: Aluminum
PACK QUANTITY	1 piece

Weight [g]	Part #
148	S000027

CONTROL BELT FOR FLOWSORT® DIVERTERS

MODEL	Compatible with SLD, DLD and ZZ diverters
DESCRIPTION	Belt for direction control
PACK QUANTITY	1 piece

	Weight [g]	Part #
	11	V000005

TRANSMISSION BELT DIRECTION CONTROL FOR FLOWSORT® DIVERTERS

MODEL	Compatible with SLD, DLD and ZZ diverters
DESCRIPTION	Transmission belt for control pulses for wheel drive assembly
PACK QUANTITY	1 piece

	Weight [g]	Part #
	21	V000029

DRIVE BELT FOR FLOWSORT® DIVERTERS

MODEL	Compatible with SLD, DLD and ZZ diverters
DESCRIPTION	Timing belt for motion control
PACK QUANTITY	1 piece

	Weight [g]	Part #
	10	V000028

TRANSMISSION BELT WHEEL DRIVE FOR FLOWSORT® DIVERTERS

MODEL	Compatible with SLD, DLD and ZZ diverters
DESCRIPTION	Transmission belt for wheel drive
PACK QUANTITY	1 piece

	Weight [g]	Part #
	19	V000047
